

ED Provider Note Remodel- Diagnosis

Authored by Oklahoma Clinical Informatics

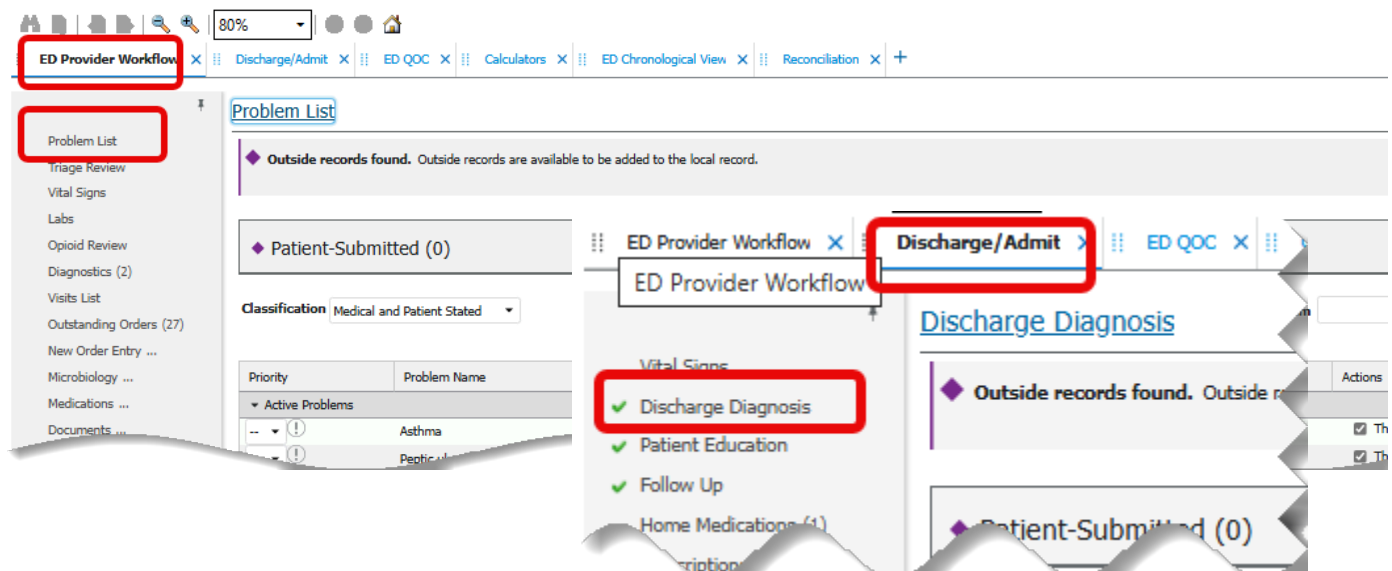

Overview: This job aid is designed to assist Emergency Department providers by illustrating the proper method for documenting ICD-10 diagnosis codes within the new note system and integrating this process into their existing workflow.

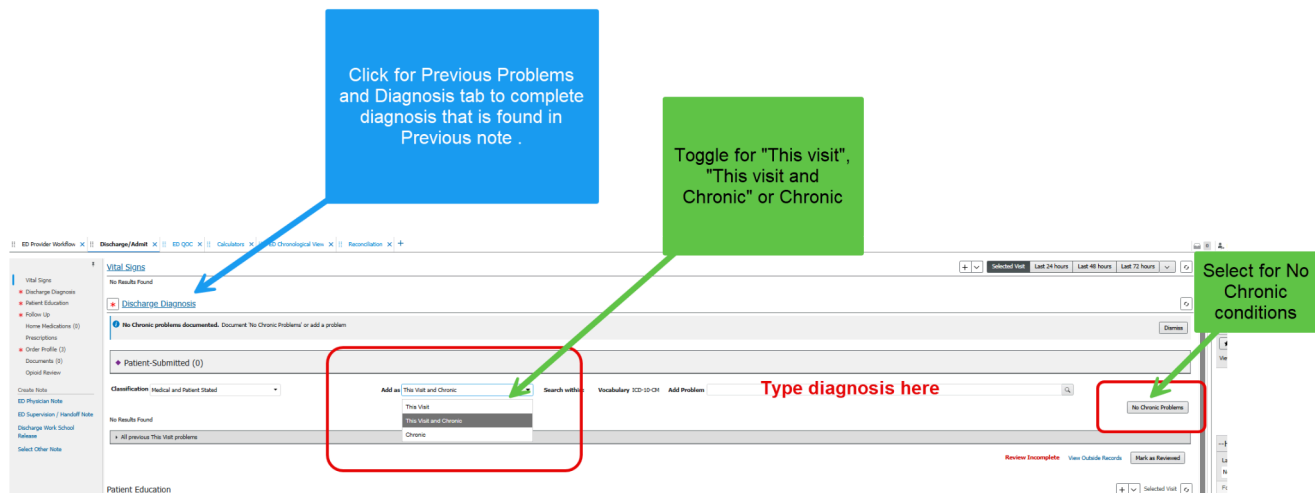

Discharge Diagnosis

Discharge Diagnosis Step-by-Step Guide

1. Before completing your note, go to your **ED Provider workflow** or your **Discharge/admit workflow**.
2. Navigate to the **Problem list** (on the **ED Provider workflow**) or **Discharge diagnosis** (on the **Discharge/admit workflow**).

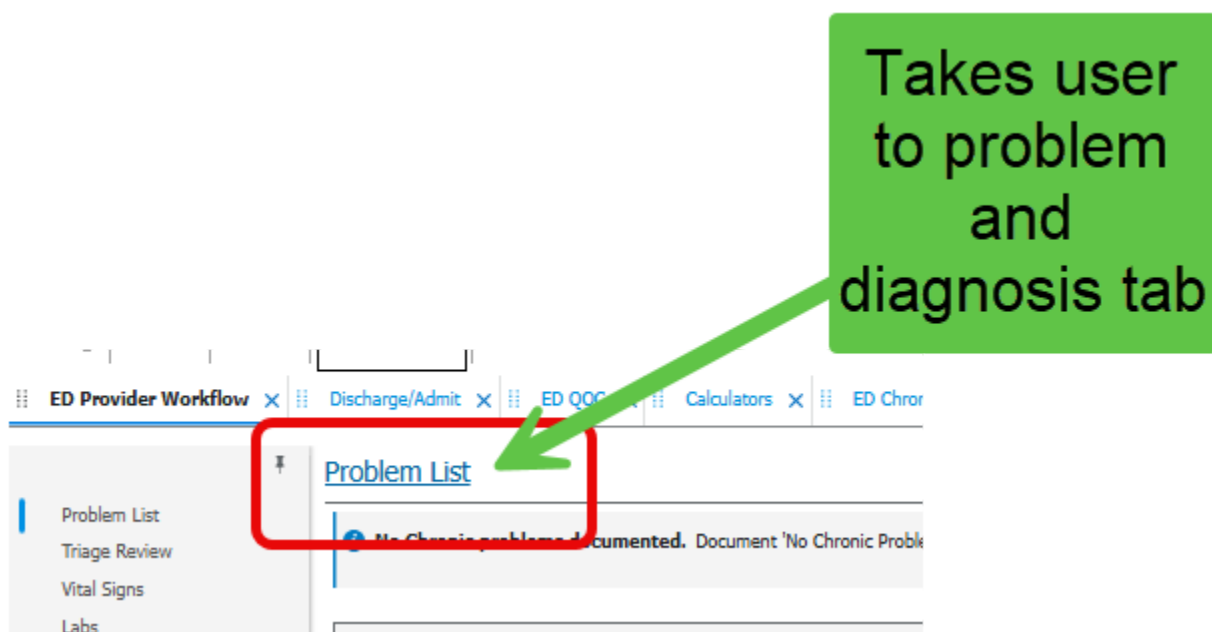

3. Go to **add Problem**.
4. Start typing the diagnosis. **Select appropriate diagnosis**.
5. **Chronic Problems**
 - **REQUIREMENTS:** This discharge diagnosis component will require a chronic problem to be completed.
 - There is an option to **select NO chronic problems**.
 - To enter a chronic discharge problem, toggle the search from "This visit" to "chronic" or "This visit and chronic" then search the chronic problem.

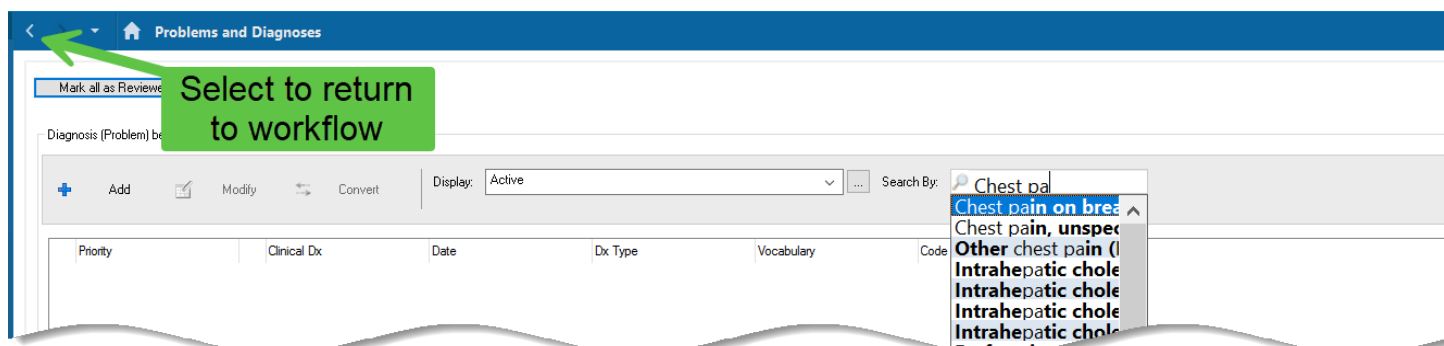

6. To utilize the familiar problem list:

- **Select the header hyperlink.** This will take you to the **Problems and diagnoses** in the table of contents of your patient's chart.

- Enter diagnosis as you did before.
- **Select the back button** and return to your workflow.

7. **Assessment and Plan Selection** (in the clinical workspace):

- It is best to **select the drop down** and choose the appropriate option:
 - “*outpatient- Assessment and Plan*” (Includes orders from ED visit)
 - “*Diagnosis only- Assessment and Plan*” (Just diagnosis)

The screenshot shows the clinical workspace interface. On the left, there's a table with columns 'Classification' and 'Actions'. It lists two 'Medical' problems, each with checkboxes for 'This Visit' and 'Chronic', and a 'Resolve' link. Below the table are buttons for 'Review Incomplete', 'View Outside Records', and 'Mark as Reviewed'. On the right, a sidebar titled 'Clinical Entry' shows a dropdown menu for 'Assessment and Plan' with options: 'Inpatient - Assessment & Plan', 'Assessment & Plan Template', 'Diagnoses Only - Assessment & Plan', 'Inpatient - Assessment & Plan', and 'Outpatient - Assessment & Plan'. Red stars highlight the 'Inpatient' and 'Outpatient' options. Below the dropdown, there are sections for 'Asthma' and 'Peptic ulcer' with text input fields. At the bottom, a section titled 'Orders (Last 12 Hours):' lists a 'CBC w Automated Differential (CBC)' order with details: '03/31/26 11:21:00 CDT, Emergency collect, 03/31/26 11:21:00 CDT, Override Share Y/N'.

8. **Complete the rest of the discharge.** (see ED Provider note remodel - Discharge workflowJob Aid - 2026-16-03 for more information on completing the discharge)
