

Dragon Medical One - Basics

Authored by Oklahoma Clinical Informatics

Overview: This job aid provides the basic information to get started with Dragon Medical One. If you need access to Dragon, contact your manager or the medical staff office.

Microphones

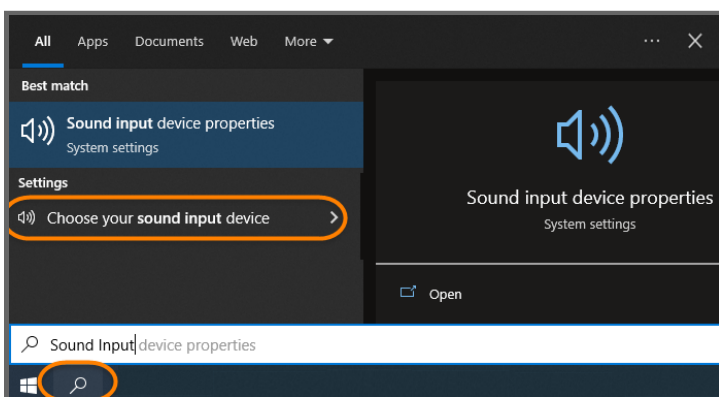

When you first login to Dragon, you can choose which available microphone is used.

Any microphone can be used with Dragon, but we recommend PowerMic Mobile as it has the best accuracy.

Mobile Mic on Personal Smartphone	USB Corded PowerMic ii/iii

[Click here to get the app setup.](#)

TROUBLESHOOTING: If your microphone is not showing up as an option, check your computer microphone input settings

Input

Choose your input device

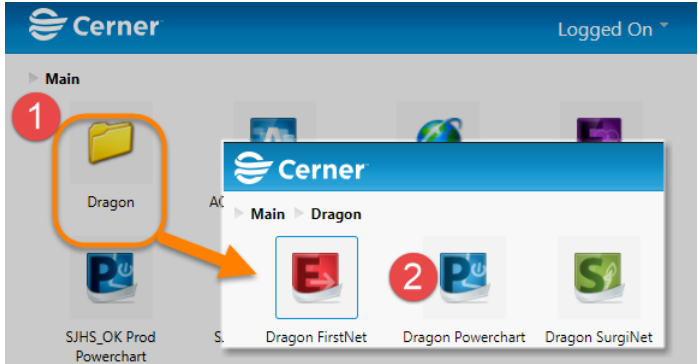

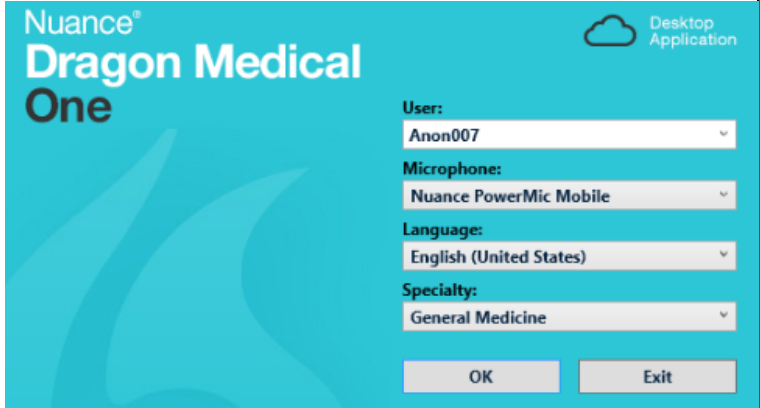

Microphone (Sennheiser SC60 for Ly...)

Certain apps may be set up to use different sound devices than the one selected here. Customize app volumes and devices in advanced sound options.

Use Dragon with Cerner

When using Dragon with Cerner, you must login with the Dragon integrated Cerner application icons. The Cerner icons will launch both Cerner and Dragon at once. Follow the steps below to login to Cerner and Dragon:

#	Action	Visual
1.	Click on one of the Dragon PowerChart, FirstNet or SurgiNet icons. NOTE: Dragon requires a provisioning request for a license. If you do not have the Dragon Cerner icons please request access from your manager or the medical staff office.	When using the Cerner application page from http://cernerapps.sjmc.org/Citrix/ProdWeb/, you will first click on the dragon folder to find the Dragon Cerner applications. 
2.	In the Dragon Medical One window, verify your username. Under Microphone, choose the microphone you would like to use. Note: PowerMicII-NS is the USB handheld microphone. Nuance PowerMic Mobile is the phone app.	
5.	Log into Cerner	

Use Dragon with Other Applications

INSTALL REQUIRED: If you have the desire to use Dragon with applications other than Cerner, you must request the "Stand-Alone Dragon Extension". Once this has been installed on your computer you will be able to dictate an endless amount of applications (email, Google Docs, etc.)

1. Click on the desktop Dragon Medical One icon.
2. Login.
3. Place your cursor where you want the text to be written.
4. Click the microphone icon to begin speaking.

If your text editor is not fully supported, the dictation box is opened and the text is written there. When you have finished dictating and correcting the text, say transfer text to move the text to your text editor.
