

Ordering PowerPlans/Add to Phase

Authored by Oklahoma Clinical Informatics

Overview: A PowerPlan is a care planning tool that allows providers the ability to manage orders, outcomes, and interventions as they relate to an individualized patient-specific, problem-driven plan of care. Like care sets, PowerPlans are also order sets, but have many additional benefits, such as:

- Proactive planning of orders prior to activation.
- Proactive duplicate checking.
- Automatic or manual plan update options.
- Adding additional orders on the fly.
- Ability to discontinue the whole plan without having to discontinue each order component individually.

NOTE: PowerPlan icon, often remembered as the “pizza box” icon,  is displayed to the left of the plan name in the search results, making it very easy to recognize plans versus care sets, and individual orders. PowerPlans combine a group of orders into a single order to expedite the process.

Ordering a PowerPlan

IMPORTANT! Many times you can order using the patient's problem or diagnosis to generate the available PowerPlans. You can also utilize PowerPlans when placing many Admission and Discharge Orders.

1. To add a PowerPlan to a patient's medical record, you will search for the specific plan in the Orders window just as you would an individual orderable.
2. Click on the  **Add** Icon in the **Orders** screen. In the **Orders Profile** screen **Search** for your PowerPlan.

5. Once you complete the order, select **Plan for Later** or **Initiate Now**.

IMPORTANT! If you select **Plan for Later**, the RN will initiate the orders at the appropriate time. You will select **Initiate Now**, if you want to **IMMEDIATELY** act on the orders.

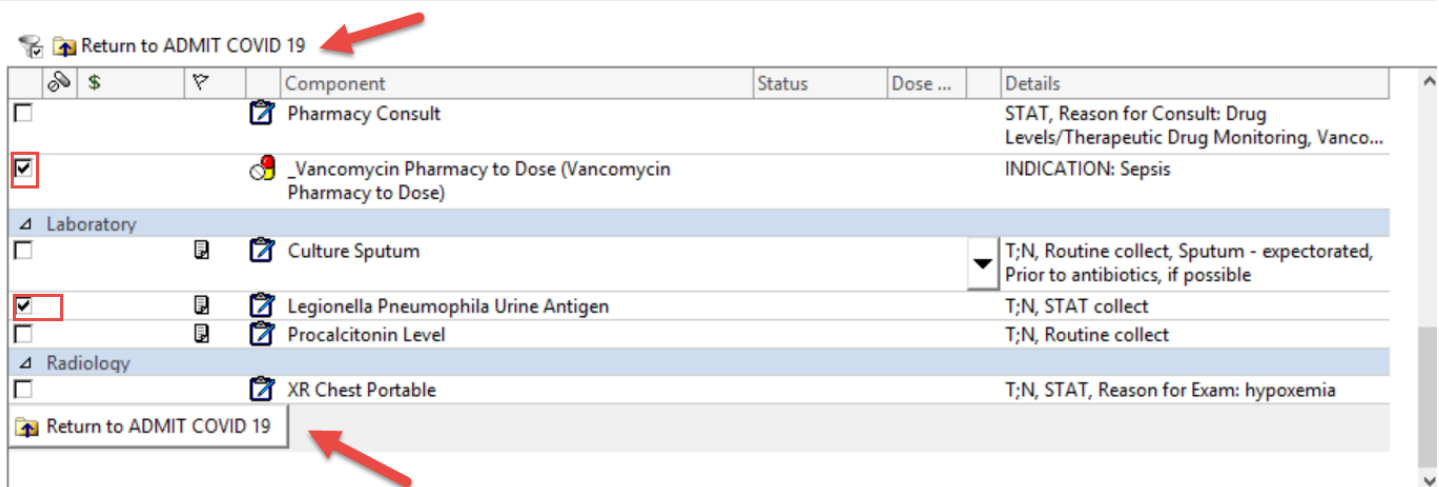

PowerPlan SubPhase Orders

- There sometime will be Subphase Orders within the PowerPlan. These orders require you to complete additional details. The Subphase Order icon resembles a double “pizza box”  .
- Click on the **Order Name**, next to the subphase icon, to open the order detail screen.

Component	Status	Dose ...	Details
☐ dexamethasone			Dose: 4 mg, Injection, IV Push, Q8 hr
☐ Non-ICU Patients (weight greater than 80kg)			
☐ dexamethasone			Dose: 4 mg, Injection, IV Push, Q6 hr
☒ Pneumonia-Community Acquired A...	Planned Pen...		0 components selected
☒ Anti-pyretics			
☒ acetaminophen			Dose: 650 mg, Tab, PO, Q4 hr, PRN, Fever PRN temperature greater than or equal to 3...

- The **Orders Detail** screen will open. Select the order options to be included in the subphase order.
- Click on the “**Return to....**” tab at the bottom or top of the order screen to return to the main order.

Component	Status	Dose ...	Details
☐ Pharmacy Consult			STAT, Reason for Consult: Drug Levels/Therapeutic Drug Monitoring, Vanco...
☒ _Vancomycin Pharmacy to Dose (Vancomycin Pharmacy to Dose)			INDICATION: Sepsis
☒ Culture Sputum			T;N, Routine collect, Sputum - expectorated, Prior to antibiotics, if possible
☒ Legionella Pneumophila Urine Antigen			T;N, STAT collect
☐ Procalcitonin Level			T;N, Routine collect
☐ XR Chest Portable			T;N, STAT, Reason for Exam: hypoxemia

- Once you are on the main **Orders Detail** page, complete the order by **Initiating** it or **Planning** it for later as outlined in step #5.

Add to Phase

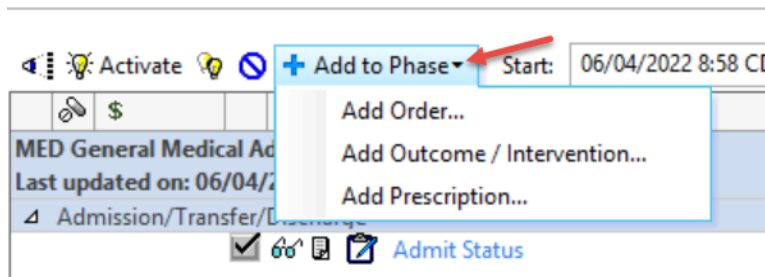

All PowerPlans hold the most common orders used by physicians, based on a patient's Problem and/or Diagnosis, however there may be individual orders that you would like to have as part of a PowerPlan. You can add individual orders to the phase of the PowerPlan, by completing the following steps. **Suggestions for Wording**

- Select the blue plus sign near Add to Phase in the Order Screen toolbar.

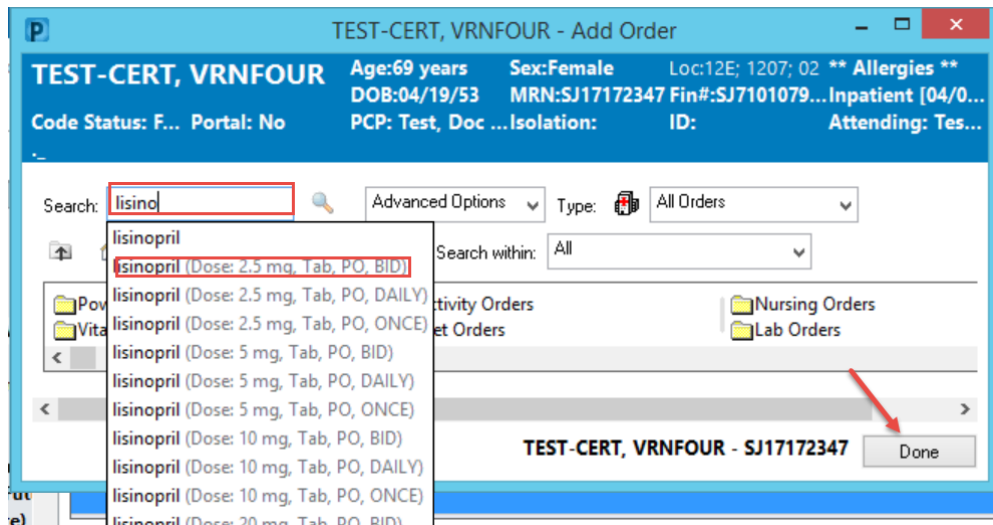

12. Select the drop down arrow and choose the option you would like to order.

NOTE: You are able to order an Outcome/Intervention, A Medication Order or choose to Add a Prescription to be sent to the patient's pharmacy.

13. Begin typing the name of the order you want to add to the **PowerPlan** and choose your option.

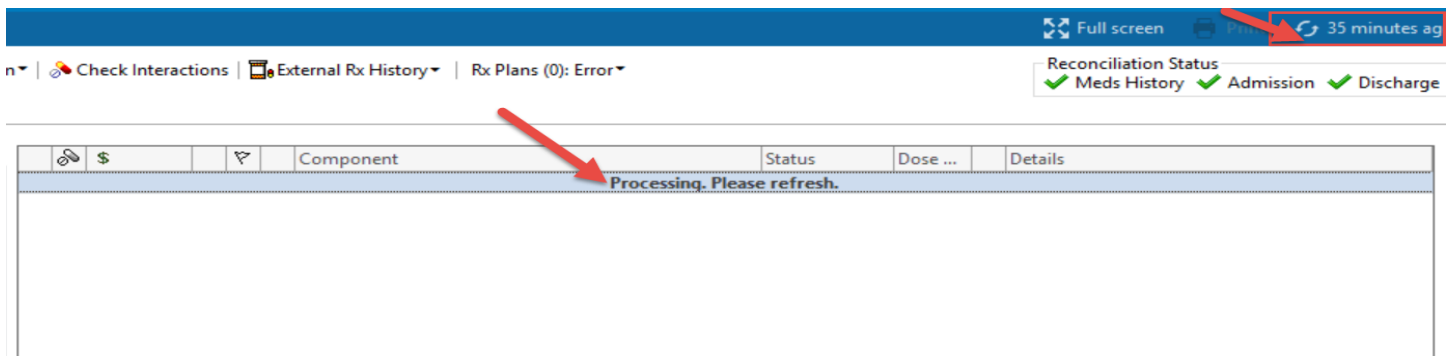

14. Select **Done**.

15. Click **Orders for Signature** at the bottom right hand of the screen.

16. Click **Sign** at the bottom right of the screen.

17. You will come to the main **Orders** page and you will see the words "**Processing Please Refresh**".

18. **Refresh** your screen by clicking on the chasing arrows at the top right in the **Orders** screen.

19. Once you Refresh you will see the **PowerPlan** with the added **Order** listed under the corresponding heading.

NOTE: Any order Added to Phase will populate under it's corresponding heading within the **PowerPlan**, i.e. **vital signs**, **referrals**, **nursing orders**, **IV's**, etc.

Activate	+	Add to Phase	Start: 06/04/2022 8:58 CDT	Stop: None	View All
		Component	Status	Dose ...	Details
		Code Status	Initiated		06/04/2022 8:58 CDT
Δ Vital Signs	✓	Vital Signs	Ordered		06/04/22 8:58:00 CDT, Routine, Per Routine
Δ Nursing Orders	✓	Intake and Output	Ordered		06/04/22 8:58:00 CDT, Routine, Q8 hr
	✓	Notify Provider (Notify Physician)	Ordered		06/04/22 8:58:00 CDT, Notify physician for BG > 350 mg/dl
Instruction					
		Education COPD	Initiated		06/04/2022 8:58 CDT
Δ Medications	✓	lisinopril (lisinopril 2.5mg tablet)	Ordered		Dose: 2.5 mg = 1 Tab, Tab, PO, BID, 06/15/22 21:00:00 CDT

20. Complete the order by clicking on **Sign** at the bottom right of the screen.
