

Cerner Mobile Apps: PCTouch, Message Center, and FetaLink+

Authored by Oklahoma Clinical Informatics

Overview: Ascension St. John provides our clinicians the ability to access Cerner features through their personal smartphones. Use this job aid to get started.

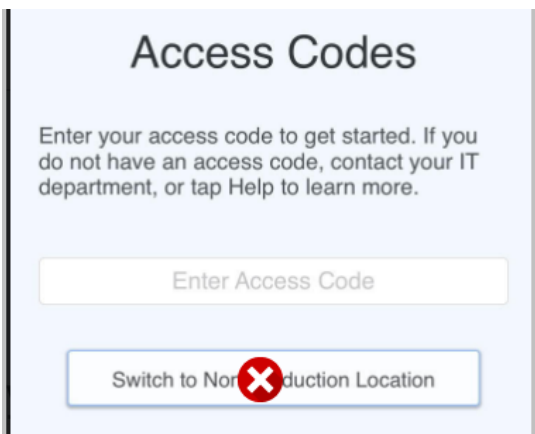

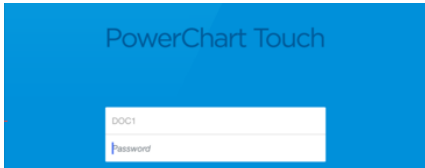

PowerChart Touch - this is an extension to the EHR that allows you to find your patient list or schedule, review the chart, create your note with templates and dictations, edit notes, place simple basic orders.

Cerner Message Center - this app allows you to review messages, send messages and sign orders on the go.

FetaLink+ - is only available for our Obstetric physicians, residents, APRNs, PAs and hospital maternal/child nurses.

Getting Started

Follow the steps below to install the mobile applications on your mobile device and obtain a device access code. The steps below will need to be completed for each device you plan to use.

Step	Action	Visual
1.	Search for Cerner in the App Store and download one or all of the following apps PowerChart Touch Cerner Message Center FetaLink+ <i>Note: FetaLink + is only available for Apple iOS devices. Android is pending FDA approval.</i>	 PowerChart Touch Medical OPEN  Cerner Message Center Medical OPEN  FetaLink+ Medical OPEN
2.	Launch the PowerChart Touch, Message Center, or the FetaLink+ application on your mobile device. The first app will ask for you to enter your access code .	sdynakx
3.	Do not select the field just below the “Enter Access Code” . Select the “ Go” on the right bottom corner in the key pad after entering the code above. You will get an error alert, if your phone does not have cellular or wifi signal.	
	Sign in using your existing Cerner username and password.
