

Auto-Text Phrases - Create, Edit, Delete & Copy

Authored by Oklahoma Clinical Informatics

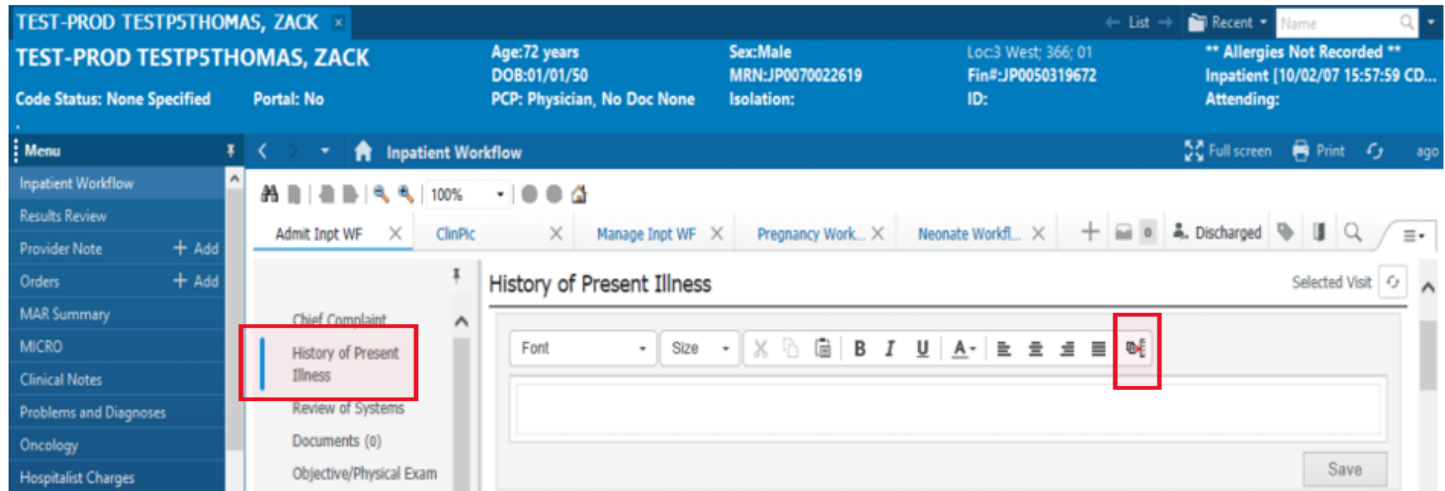

Overview: Auto-texts are keyboard shortcuts that can be used in Cerner to quickly populate a note with information from the chart. This job aid will walk you through using and creating auto-texts.

General Information

The auto-text manager tool  allows you to find, create and manage personal and public auto-text phrases. This tool can be found within: Message Center, Physician Documentation, Workflow Documentation Components (HPI, ROS & PE) and the Discharge Follow-Up.

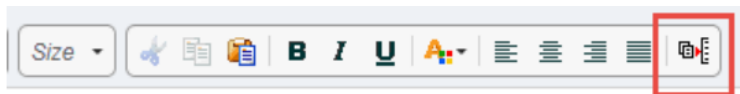

Below you will see the auto-text tool on a Workflow page:

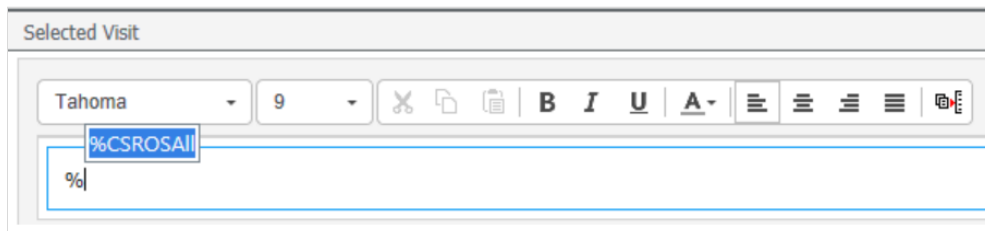

Using Auto-Text Phrases

“Public” or “Global” Auto-Texts are available for use within the Auto-Text Manager. All auto-text phrases begin with a special character in front of them (., /, %, &, etc.).

1. Click in a documentation field in the chart and click on the auto-text manager tool.

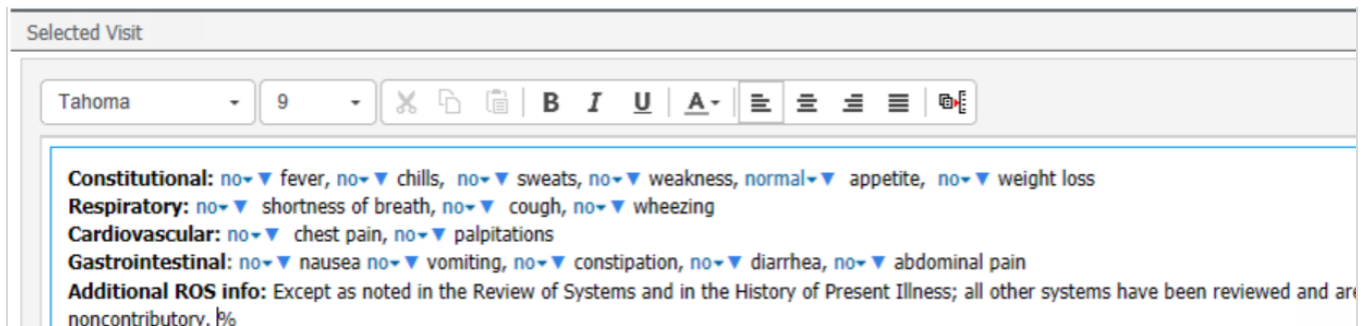

2. In the “Manage Auto-Text” window, type in the symbol associated with an auto-text (i.e. %). A list of all the auto-texts associated with that symbol appears.

Note: You must know which special character will get you the specific auto-text phrases you are looking for. If you do not know them, click the auto-text manager icon to learn what is available.

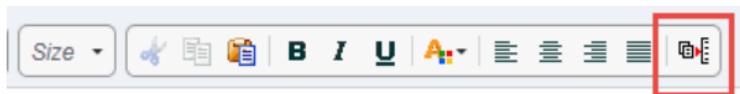

3. Double click on the one you wish to use.
4. Your auto-text will appear in your note.

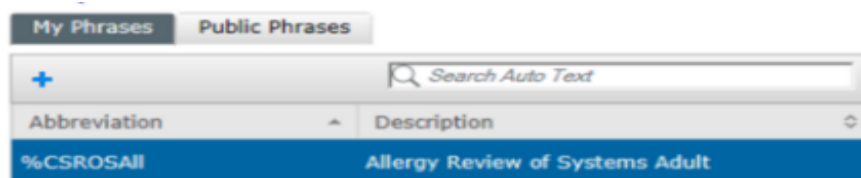

5. You can now edit any of the documentation that was pulled in using the auto-text.

Creating Personal Auto-Texts

1. Click in a documentation field in the chart and click on the auto-text manager tool.

2. the “**Manage Auto Text**” window, under the “**My Phrase**” tab, click the **blue +** symbol  to add a new phrase.

3. In the **Abbreviation** field, type a brief abbreviation you would like to use.
 - a. Start with a symbol, such as a comma, dash, etc.

IMPORTANT: Asterisk (*) is not allowed and Auto-texts are case-sensitive.

Example: %CSROSALL

TIP: Using a symbol with your initials will make it easier for you to locate your personal auto-texts.
4. In the **description** field, type the description/full name of your auto-text.

5. In the white space at the bottom of the window, you can create your auto-text content using several different features:

- a. Use the format bar to create and edit sections, headers and text in your auto-text.

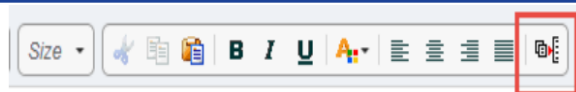

- b. Click the **Insert Templates/Tokens** button  to search for available patient-specific data elements you can pull into your auto-text.
- c. Click the **Create Drop List** button  to add a drop-down list into your auto-text.
- d. Use the “**Use Blank Default**” checkbox to prevent the first item in the dropdown from being inserted automatically.

6. When you are done, click **Save**.

7. You can now use the auto-text by typing the abbreviation in a documentation field.

NOTE: If you want to use Auto-Text in Message Center when sending Messages, the text in your created Auto-text must be converted to “RTF”.

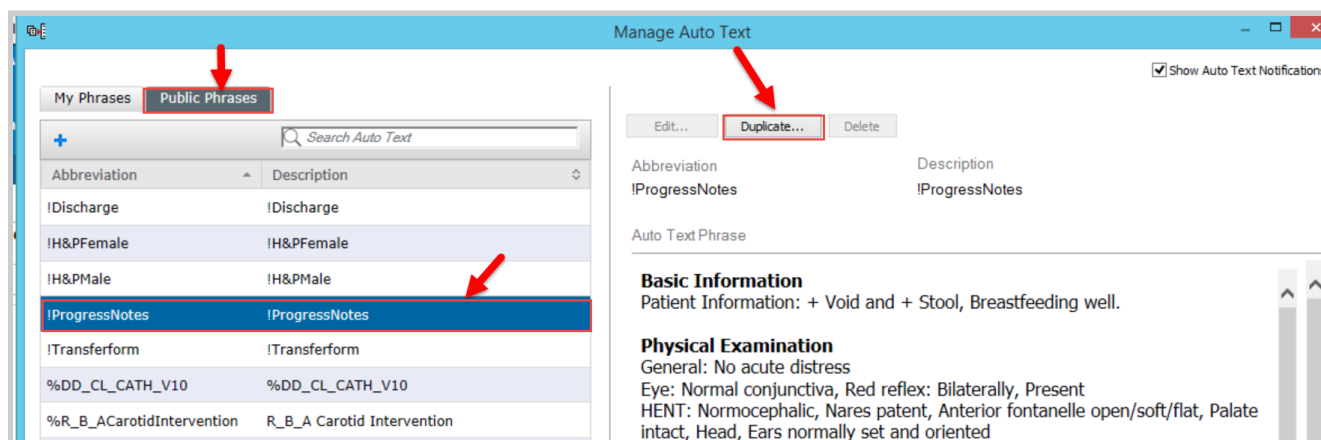

Editing Personal Auto-Texts

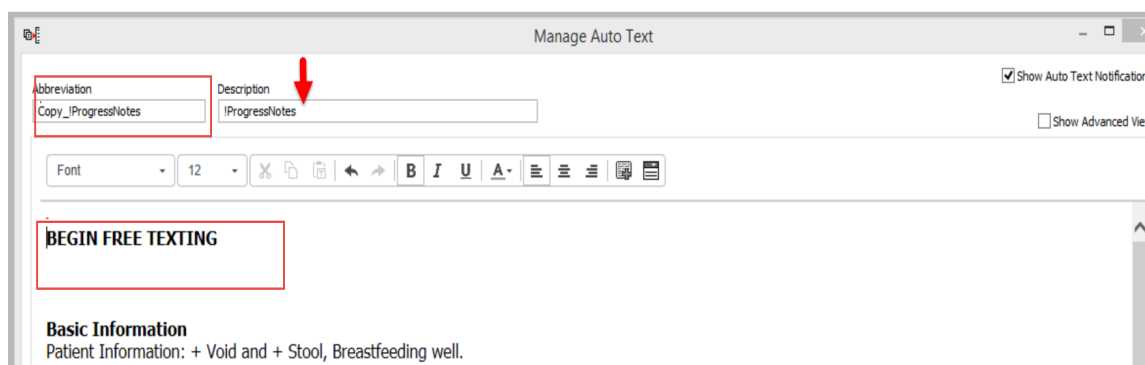

1. Click on the auto-text tool icon
2. Locate the auto-text you wish to edit in the My Phrases list.
3. Select the auto-text manager by clicking once, then select **Edit, Duplicate, or Delete** from the right-hand side of the window.
 - a. **Edit** – opens the auto-text window to allow for changes to be made
 - b. **Duplicate** – Copies the selected auto-text. Be sure to update the abbreviation field.
 - c. **Delete** – removes the selected auto-text from your phrases.

Duplicating a Public Phrase for Personal Use

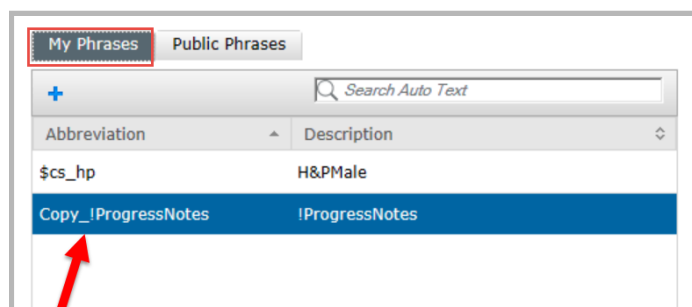

1. Click on the auto-text tool icon
2. In the **Manage Auto Text**, click the **Public Phrases** tab.
3. On the bottom left, find and click on an available auto-text phrase.
4. Click on the **Next** button, to find more auto-text phrases.
5. Once you locate the auto-text you want, the detailed information will appear in the **Manage Auto text** window on the right. Click the **duplicate button** to create a copy.

6. In the **abbreviation** field, rename the auto-text to your preference.
7. In the **description** field, type what you will use this one for.
8. In the auto text phrase section, you can edit the content of the auto-text using the same features described above for “Creating Personal Auto-Text” Begin Free texting and editing your information.

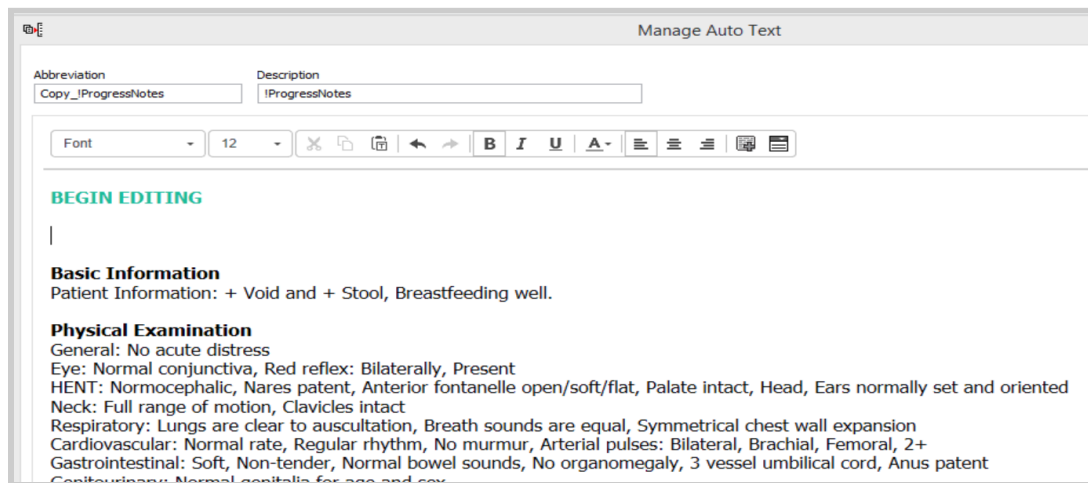

9. Your customized auto-text will be saved under “My Phrases”.

Editing a Personal Auto-text

1. In the Managing Auto Text field under the “My Phrases” tab, select the auto-text you want to Edit.
2. Click the **Edit** button and the **Manage Auto Text** box will expand.
3. Begin editing your Auto Text

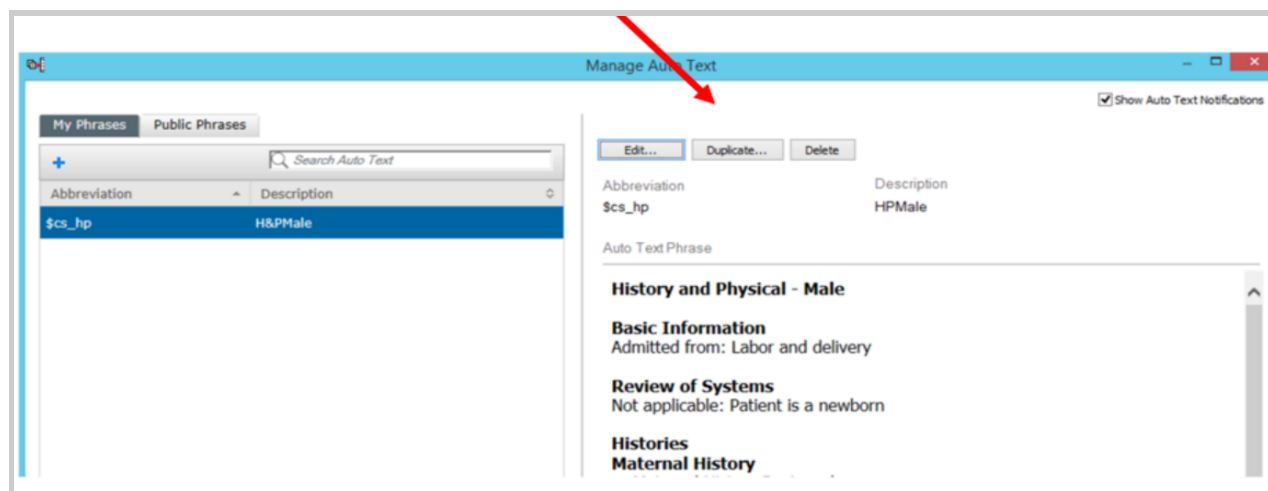

NOTE: You are also able to edit in the abbreviation and description fields.

The screenshot shows the 'Manage Auto Text' window. At the top, there are fields for 'Abbreviation' (containing 'Copy_IProgressNotes') and 'Description' (containing 'IProgressNotes'). Below these is a rich text editor with a toolbar containing options for font, size, bold, italic, underline, text color, background color, bulleted list, numbered list, and link. The editor area contains the text: 'BEGIN EDITING', followed by a vertical line, then 'Basic Information' and 'Physical Examination' sections with detailed medical notes. The 'Basic Information' section includes 'Patient Information: + Void and + Stool, Breastfeeding well.' The 'Physical Examination' section includes 'General: No acute distress', 'Eye: Normal conjunctiva, Red reflex: Bilaterally, Present', 'HENT: Normocephalic, Nares patent, Anterior fontanelle open/soft/flat, Palate intact, Head, Ears normally set and oriented', 'Neck: Full range of motion, Clavicles intact', 'Respiratory: Lungs are clear to auscultation, Breath sounds are equal, Symmetrical chest wall expansion', 'Cardiovascular: Normal rate, Regular rhythm, No murmur, Arterial pulses: Bilateral, Brachial, Femoral, 2+', 'Gastrointestinal: Soft, Non-tender, Normal bowel sounds, No organomegaly, 3 vessel umbilical cord, Anus patent', and 'Genitourinary: Normal genitalia for age and sex'.

Deleting a Personal Auto-text

1. In the **Managing Auto Text** field under the “My Phrases” tab, select the auto-text you want to **Delete**.
2. Click the **Delete** button and you will get a pop-up that asks if you want to delete the selected auto text.
3. Select Yes or No to delete the auto-text.

The screenshot shows the 'Manage Auto Text' window with the 'My Phrases' tab selected. A list of auto-texts is displayed with columns for 'Abbreviation' and 'Description'. The entry '\$cs_hp' with description 'H&PMale' is selected. To the right of the list are buttons for 'Edit...', 'Duplicate...', and 'Delete'. A red arrow points to the 'Delete' button. Below the buttons, the 'Auto Text Phrase' section shows the content of the selected auto-text, which includes 'History and Physical - Male', 'Basic Information' (Admitted from: Labor and delivery), 'Review of Systems' (Not applicable: Patient is a newborn), and 'Histories' (Maternal History).

Copy Another Provider's AutoText

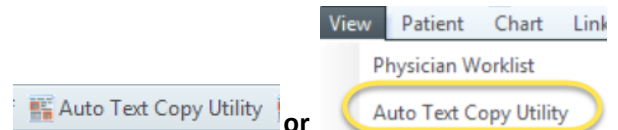

The **Auto Text Copy Utility** tool allows any provider or scribe to manage auto text. With this tool you can:

- Search for another users' personal or shared autotext and copy one, multiple or all of their texts.
- View your own library to remove one or all auto text phrases.
- Quickly launch the Manage Auto Text dialog to update and manage your auto text library.

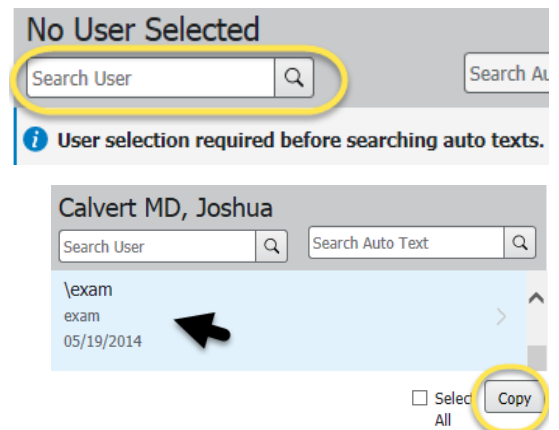

1. From the organizer, select the **Auto Text Copy Utility**.

Note: You can also access it from the View menu.

2. In the **search user** field on the left of the screen, type the name of the provider whose auto-texts you want to copy.

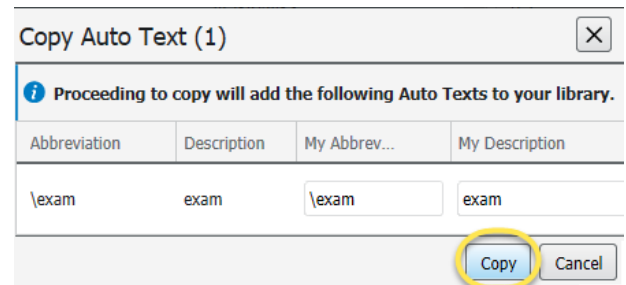

3. Click on the auto text and click **copy**.

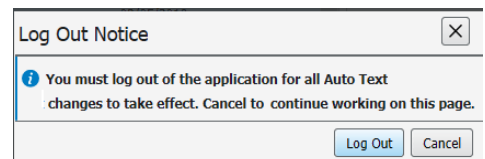

Tips:

- If the provider has a long list, use the **search auto text** field to find a specific auto text.
- **For two:** Hold the shift key while you click on multiple auto text.
- **For all:** Check the box for select all.

4. In the copy auto text window, change the **abbreviation & description** if desired.

5. Click **log out**. A log out is required between copying auto-texts
