

Remote Access to MVD Applications

Authored by Oklahoma Clinical Informatics

Overview: This job aid will assist you with accessing applications when you are not on the Ascension St. John network. These links should work from your personal computer or designated work computer.

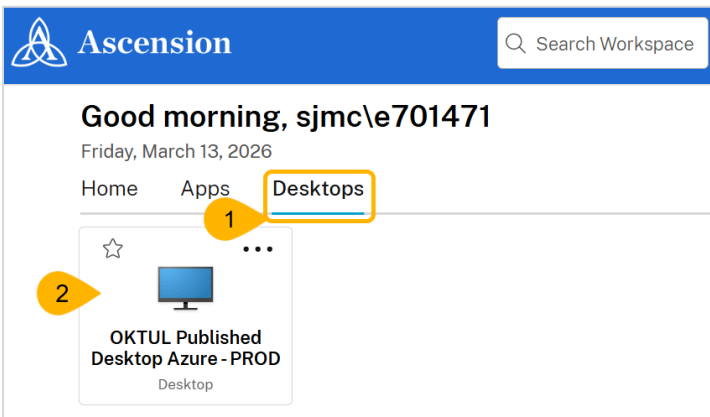

Step	Action	Visual
1.	Go to https://cloud.ascension.org/ <i>Note: When you are on site you can still use MVD from the desktop Citrix Portal icon.</i>	
2.	Sign in to the remote citrix portal with your domain \ network username and Password. <i>Example: SJMC\UName01</i>	
3.	Under Apps you will see a list of icons that you have access to. <i>Note: If you are missing any applications contact your manager or the medical staff office and ask for MVD applications to be added.</i>	
4.	To add preferred applications to your Home tab, locate the application icon and click the STAR.	
5.	Selected favorite applications will be listed on the Home page.	

Using Published Desktop to have Full Internet Capabilities

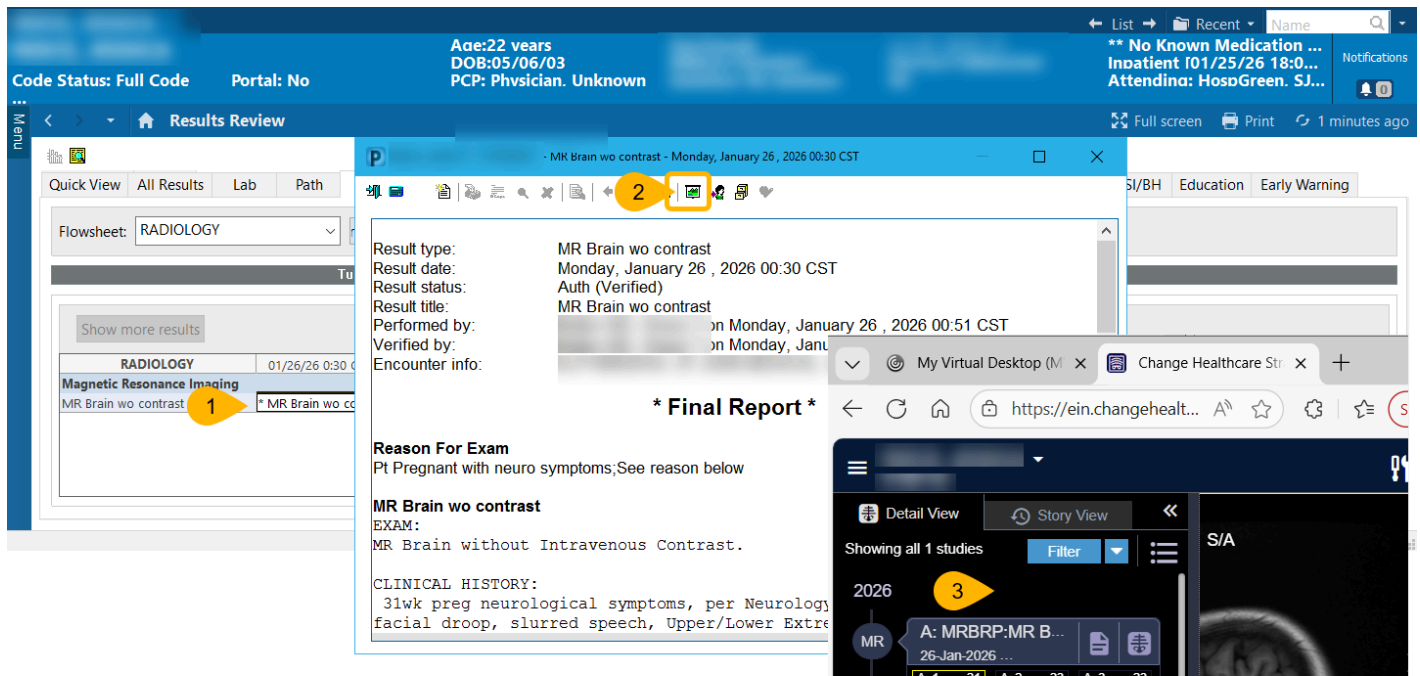

Follow the steps below to open a full desktop which will allow you to open all internal internet links on the network.

Note: When launching the Clinical Imaging Viewer from Cerner, it is only available on the Ascension network. The normal workflow above attempts to open the Imaging Viewer on your non-Ascension network and fails.

1. Select **DESKTOPS** and then click on the available **OKTUL Published Desktop**

2. You will be able to open Cerner Powerchart and view images from radiology reports.

Troubleshooting tips:

1. Make sure you have the [latest citrix receiver](#) on your computer.
2. Microsoft Edge and Google Chrome (latest stable version) are the best browsers to utilize.
3. If you are missing applications on MVD, your manager will need to submit a request to have them added.
