

# New remote access portal talking points

Ascension  
Technologies

## Immediate transition to new remote access portal required

### What is the impact?

- Starting Wednesday, March 11, use only this website to log in remotely: <https://cloud.ascension.org> for uninterrupted access to the applications you need for patient care and daily operations.
- The previous remote address [mvd.sjmc.org](https://mvd.sjmc.org) will no longer work on this date.

### Why this matters

Moving to a single new remote site for one secure entry point makes our clinical and business systems safer and more secure.

### Who is impacted?

All associates and clinicians who work remotely must start using the new access address <https://cloud.ascension.org>.

### Action required

Please start using [cloud.ascension.org](https://cloud.ascension.org) immediately to avoid any interruption to your work:

1. **Access the new address:** <https://cloud.ascension.org>.
2. **Bookmark** it for easy access later.
3. **Log in** with your standard work credentials (**SJMC\Username**).
4. **Validate access:** Open your required clinical applications (like Cerner, Epic or Varian) to confirm that your application icons appear correctly
